Abstract This study examined the effects of a 12-week, 100% bodyweight resistance training program on the body composition and muscle strength of 10 sedentary, middle-aged men. The program was designed to increase muscle mass and strength while decreasing body fat. The program consisted of three sessions per week, each lasting 45 minutes. The program was designed to increase muscle mass and strength while decreasing body fat. The program consisted of three sessions per week, each lasting 45 minutes. The program was designed to increase muscle mass and strength while decreasing body fat. The program consisted of three sessions per week, each lasting 45 minutes.
